THE F3010 FOR TRIMMING GOATS AND SHEEPS.

Hoof trimming of sheep and goats is necessary for their comfort. Removing excess horn to maintain good footing and help combat foot rot is essential.

The F3010 hoof trimming kit has been designed to reduce the effort required by the farmer to trim the hoof. It is easy to use, precise and concise. The progressive nature of the F3010 Electrocoup provides a very precise trimming action and considerably reduces the risk of injury to the animal. Absolutely silent, the INFACO battery-operated nail kit avoids stressing the animal during this trimming operation.
